TECHNICAL SKILLS

Languages: SQL (Postgres, Oracle), Python (Pandas, NumPy), R, Advanced Excel, REST APIs
Visualization: Tableau, Power BI, Looker Studio, Matplotlib, Seaborn, Plotly, Streamlit
Tools: Alteryx, Snowflake, BigQuery, Jupyter Notebook, Git, Board ERP, MS Office Suite, Jira
Concepts: Business Intelligence, Data Modeling, Statistical Analysis, A/B Testing, EDA, Hypothesis Testing

EXPERIENCE

- Graduate Teaching Assistant** September 2025 – Present
Northeastern University *Boston, MA*
- Delivered course content on Advanced SQL, Data Warehousing using Snowflake and BigQuery, and Query Optimization to 90+ graduate students across 2 analytics courses
 - Achieved 100% student satisfaction by hosting weekly office hours covering data analysis, visualization, and statistical modeling
- Analytics Consultant Intern** June 2025 – August 2025
Board Americas *Boston, MA*
- Cut planning timelines by 25% for 3 enterprise clients by consolidating fragmented data sources into Board ERP with automated daily refresh workflows
 - Built FP&A application with P&L reporting, budgeting modules, and 5-year forecasting cycles enabling finance teams to run scenario analyses
 - Presented analytical findings and KPI dashboards to C-suite stakeholders in weekly reviews, aligning data models with business objectives
- Data Engineer** March 2024 – June 2024
Varahe Analytics *Noida, India*
- Built Tableau dashboard analyzing 19K+ polling stations across 15 districts, identifying 3 voting trends that drove 30% turnout increase
 - Cut processing time by 35% and errors by 80% by refactoring Python ETL pipelines with modular error handling, saving 12 stakeholders hours of weekly manual work
 - Mentored 2 junior analysts on data analysis workflows, SQL optimization, and stakeholder reporting through pair programming sessions
- Data Scientist** February 2022 – March 2024
Paisabazaar *Gurugram, India*
- Cut decision-making time by 80% by building Power BI dashboards integrating financial data from third-party APIs for weekly senior management reviews
 - Reclaimed 4 hours daily by automating reporting workflows with Python, improving delivery of findings to non-technical stakeholders
 - Grew partner product from \$1.2M to \$11M in 3 months by identifying high-value segments through funnel analysis as analyst on 4-person product team
 - Partnered with Product, Engineering, and Marketing to launch 3 financial products, translating business requirements into analytical specs

PROJECTS

- Warehouse Network Supply Chain Optimization** | *Python, PuLP, Streamlit, Pandas*
- Cut shipping costs by 25% by building linear optimization model using PuLP for 3-warehouse network with demand and capacity constraints
 - Built interactive what-if scenario tool with Streamlit for supply chain managers, featuring live data connectors and downloadable Excel reports
- Inventory Optimization Forecasting Model** | *Python, SARIMA, Monte Carlo, Pandas*
- Built 12-week forecasting model for retail chain with 508 ASINs, revealing 97% seasonal decline and stockout risk patterns through EDA
 - Implemented Monte Carlo simulation with 10K iterations for stochastic modeling, enabling risk-adjusted reorder points and safety stock calculations

EDUCATION

- Northeastern University** *Boston, MA*
Master of Science in Business Analytics (GPA: 3.88/4.0) *December 2025*
- University of Delhi** *Delhi, India*
Bachelor of Science in Physics *July 2021*
